EDUCATION

Bachelors Computer Science Information Technology

Butwal

Butwal Multiple Campus

Nov, 2019 - Sep, 2023

PROJECTS

Employee management

Designed and developed a comprehensive PHP-based Employee Management System aimed at optimizing HR operations. This system empowers administrators with complete control over employee data management. It allowing administrators to add, edit, view and delete employee data stored in a database.

Shopping management

Created a laravel-based shopping management system , enabling users to order and view products.It facilitate seamless product ordering and viewing for users, integrated with a robust database for efficient data storage.

Online Bakery Delivery and Gateway System management

Designed and implemented a web-based application to facilitate the purchase and sale of bakery products, providing a seamless platform for both customers and sellers using laravel framework.

Excel project – Store Data Analysis :

Analyzed data and created dashboard using excel for a dummy dataset from store.Utilized Excel functions and pivot tables to analyze sales, inventory, and customer data.

Power BI Dashboard Project / HR Analytics :

Utilized Power BI to perform data analysis and built a dashboard using a dummy HR Analytics dataset.

Power BI Dashboard Project / Ecommerce Sales Dashboard

Utilized Power BI to perform data analysis and built a dashboard using a dummy Ecommerce Sales dataset.

Student Data Analysis using python

Conducted comprehensive analysis using Python to investigate the impact of parent education and marital status on student academic performance, alongside exploring gender and ethnic group distributions and other things also.

ACHIEVEMENTS

CSIT Association of Nepal Rupandehi(Executive)

The CSIT Association of Nepal Rupandehi is a non-governmental organization dedicated to enhancing professional development of Computer Science and Information Technology (CSIT) students. Organized and facilitated skillful sessions aimed at enhancing technical and soft skills among CSIT students. Collaborated with team members to plan and execute events, including seminars, hackathons, and industry talks.

Food Veda Hackathon

Participated in a hackathon and developed a web-based application focused on selling organic and healthy food products. Created a platform specifically for vendors to sell organic and healthy food items using different programming Language.
